

# EAR FORCE<sup>®</sup> X31

**XBOX LIVE<sup>®</sup> Chat plus  
Wireless Digital RF  
Stereo Game Audio**

Push your XBOX 360<sup>®</sup> experience to a new level with wireless digital RF game sound and XBOX LIVE communication. Pump up the volume without disturbing others. Hear subtle sound cues that speakers can't deliver — from an opponent sneaking up behind you to your teammate's voice right next to you. Freely move around as you play. Block out distractions and become a better player.

## When It's Too Late To Be Loud...

Talk trash and communicate online without disturbing others. Play it loud all night long!

## YOUR GAME JUST GOT BETTER<sup>™</sup>

### Wireless Digital RF Technology

Uncompressed, 2.4 GHz wireless digital RF audio with frequency hopping delivers CD-quality game sound rivaling professional-grade wired headphones.

### Heart-Thumping Bass Boost

Bass Boost produces head-rattling explosions, gun blasts and other deep-bass game sounds.

### Stereo Expander for Wide Panorama

Stereo expander spreads out the audio separation for fuller game sound.

### Adjust Game & Chat Volumes Separately

Independent volume controls let you balance game and talkback signals. Mute switch lets you shut off the mic when you don't want to be heard.

### Hear Voice Chat with Stereo Game Sound

Hear your teammates mixed in with the game audio and overcome the limitation of communicator headsets that block game sound from one ear.

### Eliminate Game Audio Mic Bleed

Turn up the game volume without the aggravation of audio bleeding into your chat mic, as it does with external speakers.

### Chat Boost<sup>™</sup> Dynamic Level Control

Chat volume automatically increases when the game gets louder, so you can always hear teammates on XBOX LIVE.
